CNNI Cognitive Neuroscience
and Neuroimaging

Volume 7, Number 2, February 2022

IN THIS ISSUE - FEBRUARY

- 119 **A brief summary of the articles appearing in this issue of *Biological Psychiatry: Cognitive Neuroscience and Neuroimaging***

COMMENTARIES

- 121 **Identifying Neurobiological Markers of Posttraumatic Stress Disorder Using Resting-State Functional Magnetic Resonance Imaging Data: The Promise of Data-Driven Computational Approaches**
Yuval Neria, Amit Lazarov, and Xi Zhu
» See corresponding article on page 139
- 124 **Advances and Future Directions in Understanding Associations Between Stressful Events and Cortical Thickness in Psychosis Risk**
Nicole R. Karcher
» See corresponding article on page 171
- 127 **Real-Life Stressors, Neurocognitive Predictors, and Anxiety Trajectories—Associations and Future Challenges**
Julia Klawohn
» See corresponding article on page 192

ARCHIVAL REPORTS

- 129 **Acute Posttraumatic Symptoms Are Associated With Multimodal Neuroimaging Structural Covariance Patterns: A Possible Role for the Neural Substrates of Visual Processing in Posttraumatic Stress Disorder**
Nathaniel G. Harnett, Jennifer S. Stevens, Negar Fani, Sanne J.H. van Rooij, Timothy D. Ely, Vasiliki Michopoulos, Lauren Hudak, Alex O. Rothbaum, Rebecca Hinrichs, Sterling J. Winters, Tanja Jovanovic, Barbara O. Rothbaum, Lisa D. Nickerson, and Kerry J. Ressler
- 139 **Hippocampal Resting-State Functional Connectivity Forecasts Individual Posttraumatic Stress Disorder Symptoms: A Data-Driven Approach**
Jacklynn M. Fitzgerald, Elisabeth Kate Webb, Carissa N. Weis, Ashley A. Huggins, Ken P. Bennett, Tara A. Miskovich, Jessica L. Krukowski, Terri A. deRoos-Cassini, and Christine L. Larson
» See commentary on page 121
- 150 **Neural Responsivity to Reward Versus Punishment Shortly After Trauma Predicts Long-Term Development of Posttraumatic Stress Symptoms**
Ziv Ben-Zion, Ofir Shany, Roe Admon, Nimrod Jakob Keynan, Netanel Avisdris, Shira Reznik Balter, Arie Y. Shalev, Israel Liberzon, and Talma Hendler

- 162 Mediation on the Association Between Stressful Life Events and Depression by Abnormal White Matter Microstructures**
Yun Wang, Qi Wang, Jie Xie, Yan Zhu, Danwei Zhang, Guohai Li, Xiaolan Zhu, and Yuefeng Li
- 171 Life Event Stress and Reduced Cortical Thickness in Youth at Clinical High Risk for Psychosis and Healthy Control Subjects**
Katrina Aberizk, Meghan A. Collins, Jean Addington, Carrie E. Bearden, Kristin S. Cadenhead, Barbara A. Cornblatt, Daniel H. Mathalon, Thomas H. McGlashan, Diana O. Perkins, Ming T. Tsuang, Scott W. Woods, Tyrone D. Cannon, and Elaine F. Walker
 » See commentary on page 124
- 180 Neural Response to Social Exclusion Moderates the Link Between Adolescent Anxiety Symptoms and Substance Use**
Sarah J. Beard, Paul D. Hastings, Emilio Ferrer, Richard W. Robins, and Amanda E. Guyer
- 192 Neurocognitive Profiles in Adolescence Predict Subsequent Anxiety Trajectories During the COVID-19 Pandemic**
Santiago Morales, Selin Zeytinoglu, George A. Buzzell, Emilio A. Valadez, Sonya V. Troller-Renfree, Maureen E. Bowers, Andrea Chronis-Tuscano, Kathryn A. Degnan, Alisa N. Almas, Daniel S. Pine, and Nathan A. Fox
 » See commentary on page 127
- 201 Association Between a Directly Translated Cognitive Measure of Negative Bias and Self-reported Psychiatric Symptoms**
Lucie Daniel-Watanabe, Martha McLaughlin, Siobhan Gormley, and Oliver J. Robinson
- 210 Transcranial Direct Current Stimulation of the Ventromedial Prefrontal Cortex Modulates Perceptual and Neural Patterns of Fear Generalization**
Kati Roesmann, Thomas Kroker, Sarah Hein, Maimu Rehbein, Constantin Winker, Elisabeth Johanna Leehr, Tim Klucken, and Markus Junghöfer
- 221 Behavioral and Magnetoencephalographic Correlates of Fear Generalization Are Associated With Responses to Later Virtual Reality Exposure Therapy in Spider Phobia**
Kati Roesmann, Elisabeth Johanna Leehr, Joscha Böhnlein, Christian Steinberg, Fabian Seeger, Hanna Schwarzmeier, Bettina Gathmann, Niklas Siminski, Martin J. Herrmann, Udo Dannlowski, Ulrike Lueken, Tim Klucken, Kevin Hilbert, Thomas Straube, and Markus Junghöfer
- 231 Impact of Prenatal Stress on Amygdala Anatomy in Young Adulthood: Timing and Location Matter**
Klara Mareckova, Radek Marecek, Lenka Andryskova, Milan Brazdil, and Yuliya S. Nikolova

One of the eight multimodal structural covariance profiles and associated structural covariance networks, as identified by Harnett *et al.* in this issue (pages 129–138), is featured on the cover. In this work, the authors identified a multimodal structural pattern that was related to acute severity and variability over time of posttraumatic stress symptoms, providing insight into the structural brain correlates of acute traumatic stress reactivity. See Figure S1 for additional details.
