CNNI Cognitive Neuroscience
and Neuroimaging

Volume 7, Number 6, June 2022

IN THIS ISSUE - JUNE

- 525** A brief summary of the articles appearing in this issue of *Biological Psychiatry: Cognitive Neuroscience and Neuroimaging*

COMMENTARIES

- 527** **Enhancing Repetitive Transcranial Magnetic Stimulation Effects for Depression Treatment: *Navigare Necesses Est*—and Smart Clinical Trial Designs**
Andre R. Brunoni, Zhi-De Deng, and Frank Padberg
» See corresponding article on page 536
- 530** **Looking at Change: Examining Meaningful Variability in Psychophysiological Measurements**
Hannah I. Volpert-Esmond
» See corresponding article on page 555
- 532** **Insights Into the Temporal Dynamics of Cognitive Control in Kindergarteners With Autism Spectrum Disorder**
Megan A. Boudewyn
» See corresponding article on page 566
- 534** **Decoding Population Variance in Resting-State Functional Connectomes**
Adam S. Smith
» See corresponding article on page 576

REVIEWS

- 536** **Personalizing Repetitive Transcranial Magnetic Stimulation Parameters for Depression Treatment Using Multimodal Neuroimaging**
Deborah C.W. Klooster, Michael A. Ferguson, Paul A.J.M. Boon, and Chris Baeken
» See commentary on page 527
- 546** **Electroencephalographic Connectivity: A Fundamental Guide and Checklist for Optimal Study Design and Evaluation**
Aleksandra Miljevic, Neil W. Bailey, Fidel Vila-Rodriguez, Sally E. Herring, and Paul B. Fitzgerald

ARCHIVAL REPORTS

- 555** **Understanding the Error in Psychopathology: Notable Intraindividual Differences in Neural Variability of Performance Monitoring**
Peter Eugene Clayson, Harold A. Rocha, Scott A. Baldwin, Philippe Rast, and Michael J. Larson
» See commentary on page 530
- 566** **Atypical Medial Frontal Theta Oscillations Underlying Cognitive Control in Kindergarteners With Autism Spectrum Disorder**
George A. Buzzell, Hannah R. Thomas, Yeo Bi Choi, and So Hyun Kim
» See commentary on page 532

- 576 Functional Connectivity Differences Between Two Culturally Distinct Prairie Vole Populations: Insights Into the Prosocial Network**
Richard J. Ortiz, Amy E. Wagler, Jason R. Yee, Praveen P. Kulkarni, Xuezhui Cai, Craig F. Ferris, and Bruce S. Cushing
 » See commentary on page 534
- 588 Differences in Diffusion-Weighted Imaging and Resting-State Functional Connectivity Between Two Culturally Distinct Populations of Prairie Vole**
Richard Ortiz, Jason R. Yee, Praveen P. Kulkarni, Nancy G. Solomon, Brian Keane, Xuezhui Cai, Craig F. Ferris, and Bruce S. Cushing
- 598 A Novel Biomarker of Neuronal Glutamate Metabolism in Nonhuman Primates Using Localized ¹H-Magnetic Resonance Spectroscopy: Development and Effects of BNC375, an α 7 Nicotinic Acetylcholine Receptor Positive Allosteric Modulator**
Corin O. Miller, Liza T. Gantert, Stephen F. Previs, Ying Chen, Kenneth D. Anderson, Justina M. Thomas, Gerard Sanacora, Jason M. Uslaner, Douglas L. Rothman, and Graeme F. Mason
- 607 Quantification of Metabotropic Glutamate Receptor 5 Availability With Both [¹¹C]ABP688 and [¹⁸F]FPEB Positron Emission Tomography in the *Sapap3* Knockout Mouse Model for Obsessive-Compulsive-like Behavior**
Dorien Glorie, Jeroen Verhaeghe, Alan Miranda, Stef De Lombaerde, Sigrid Stroobants, and Steven Staelens
- 616 Genomic Studies Across the Lifespan Point to Early Mechanisms Determining Subcortical Volumes**
Quentin Le Grand, Claudia L. Satizabal, Muralidharan Sargurupremraj, Aniket Mishra, Aicha Soumaré, Alexandre Laurent, Fabrice Crivello, Ami Tsuchida, Jean Shin, Mélissa Macalli, Baljeet Singh, Alexa S. Beiser, Charles DeCarli, Evan Fletcher, Tomas Paus, Mark Lathrop, Hieab H.H. Adams, Joshua C. Bis, Sudha Seshadri, Christophe Tzourio, Bernard Mazoyer, and Stéphanie Debette

An Official Journal of the Society of Biological Psychiatry

Biological Psychiatry:
 Cognitive Neuroscience and Neuroimaging

Volume 13 Number 1
 April 2016

A journal of cognitive neuroscience, neuropsychiatry, and neuropsychology in psychiatry

Ortiz *et al.* (in this issue, pages 576–587) assessed functional connectivity differences between two prairie vole populations and identified several cores of nodes that reflect various neurological contributions. Within the image featured on the cover, the networks are organized to show that the innermost nodes of each network represent the olfactory core, the second innermost is the prosocial core, the third innermost is what regions are connected to the prosocial core, and the last (outermost) ring is what is not connected to the prosocial core. Image Credit: Richard Ortiz and Random Cushing.
