

Biological Psychiatry

CNNI Cognitive Neuroscience
and Neuroimaging

Volume 7, Number 8, August 2022

IN THIS ISSUE - AUGUST

747 A brief summary of the articles appearing in this issue of *Biological Psychiatry: Cognitive Neuroscience and Neuroimaging*

COMMENTARIES

749 Targeting Developmental Thalamocortical Connectivity Abnormalities for Psychosis Prediction: How Far Are We From Biomarker Identification?

Eleonora Maggioni and Paolo Brambilla

» See corresponding article on page 782

752 Electroencephalographic Biomarkers in Psychiatry—How Do We Make Good on Promises?

Sarah L. Karalunas

» See corresponding article on page 814

754 The Importance of Psychosocial Factors in the Interpretation of Neural Findings

Joan Luby

» See corresponding article on page 824

ARCHIVAL REPORTS

756 Inflexible Updating of the Self-Other Divide During a Social Context in Autism: Psychophysical, Electrophysiological, and Neural Network Modeling Evidence

Jean-Paul Noel, Renato Paredes, Emily Terrebonne, Jacob I. Feldman, Tiffany Woynaroski, Carissa J. Cascio, Peggy Seriès, and Mark T. Wallace

765 Affect Regulation—Related Emergent Brain Network Properties Differentiate Depressed Bipolar Disorder From Major Depression and Track Risk for Bipolar Disorder

Jeffrey M. Spielberg, Naomi Sadeh, Jungwon Cha, Melanie A. Matyi, and Amit Anand

774 Cross-lagged Relationships Between Depressive Symptoms and Altered Default Mode Network Connectivity Over the Course of Adolescence

Mohammad H. Afzali, Alain Dagher, Josiane Bourque, Sean Spinney, and Patricia Conrod

782 Development of Thalamocortical Structural Connectivity in Typically Developing and Psychosis Spectrum Youths

Suzanne N. Avery, Anna S. Huang, Julia M. Sheffield, Baxter P. Rogers, Simon Vandekar, Alan Anticevic, and Neil D. Woodward

» See commentary on page 749

793 Interoception Underlies Therapeutic Effects of Mindfulness Meditation for Posttraumatic Stress Disorder: A Randomized Clinical Trial

Seung Suk Kang, Scott R. Sponheim, and Kelvin O. Lim

805 High-Risk Drinkers Engage Distinct Stress-Predictive Brain Networks

Elizabeth V. Goldfarb, Dustin Scheinost, Nia Fogelman, Dongju Seo, and Rajita Sinha

- 814 Electroencephalographic Microstates as Novel Functional Biomarkers for Adult Attention-Deficit/Hyperactivity Disorder**
Victor Férat, Martijn Arns, Marie-Pierre Deiber, Roland Hasler, Nader Perroud, Christoph M. Michel, and Tomas Ros
» See commentary on page 752

- 824 Maternal Response to Positive Affect Moderates the Impact of Familial Risk for Depression on Ventral Striatal Response to Winning Reward in 6- to 8-Year-Old Children**
Judith K. Morgan, Kristen L. Eckstrand, Jennifer S. Silk, Thomas M. Olin, Cecile D. Ladouceur, and Erika E. Forbes
» See commentary on page 754

- 833 Manipulating Reward Sensitivity Using Reward Circuit–Targeted Transcranial Magnetic Stimulation**
Jon Ryan, Jourdan J. Pouliot, Greg Hajcak, and Derek Evan Nee

CORRESPONDENCE

- 841 Normative Functional Connectivity of Thalamic Stimulation for Reducing Tic Severity in Tourette Syndrome**
Juan Carlos Baldermann, Christina Hennen, Thomas Schüller, Pablo Andrade, Veerle Visser-Vandewalle, Andreas Horn, Till A. Dembek, Jan Niklas Petry-Schmelzer, Joshua Niklas Strelow, Hannah Jergas, Jens Kuhn, Michael T. Barbe, and Daniel Huys

The cover depicts the functional connectivity and transcranial magnetic stimulation targeting used by Ryan *et al.* (in this issue, pages 833–840). In this work, the authors demonstrated that reward sensitivity in healthy individuals can be altered using transcranial magnetic stimulation that targets reward-related circuitry. See Figure 1 for full details on the cover image.
