The JV Brain. This art piece showcases an abstract representation of a human brain created using oil paint on canvas by artist Juliet Varga, a middle school student at North Salem Middle School in North Salem, NY, inspired by the research of her father, Dr. Andrew Varga, a sleep neurologist and neuroscientist at the Icahn School of Medicine at Mount Sinai.

This art is part of the 2022 Art of the Brain exhibition at The Friedman Brain Institute at the Icahn School of Medicine at Mount Sinai, which is curated by Veronica Szarejko.
