

Biological Psychiatry

CNNI Cognitive Neuroscience and Neuroimaging

Aims and Scope

Biological Psychiatry: Cognitive Neuroscience and Neuroimaging is an official journal of the *Society for Biological Psychiatry* and part of the *Biological Psychiatry* family of journals. Companion titles include *Biological Psychiatry* and *Biological Psychiatry: Global Open Science*. The Society's purpose is to promote excellence in scientific research and education in fields that investigate the nature, causes, mechanisms, and treatments of disorders of thought, emotion, and behavior. In accord with this mission, this peer-reviewed, rapid-publication, international journal focuses on studies using the tools and constructs of cognitive neuroscience, including the full range of noninvasive neuroimaging and human extra- and intracranial physiological recording methodologies. It publishes both basic and clinical studies, including those that incorporate genetic data, pharmacological challenges, and computational modeling approaches.

The journal publishes novel results of original research that represent an important new lead or significant impact on the field. Reviews and commentaries that focus on topics of current research and interest are also encouraged.

Editor

Cameron S. Carter, MD
University of California, Davis
Sacramento, California

Deputy Editors

Anissa Abi-Dargham, MD
Stony Brook, NY

Deanna M. Barch, PhD
St. Louis, MO

Edward T. Bullmore, MB, PhD
Cambridge, United Kingdom

Quentin J.M. Huys, MD, PhD
